
**Committee on Agriculture
Special Session**

TARIFF QUOTA ADMINISTRATION METHODS AND TARIFF QUOTA FILL

Background Paper by the Secretariat

1. At the first Special Session of the Committee on Agriculture on 23-24 March 2000, it was agreed that the Secretariat would provide, inter alia, a background paper on tariff quota administration methods and tariff quota fill based on notifications in this area (G/AG/NG/1, paragraph 7(a) refers).¹ This paper revises and further updates the information compiled from Members' Schedules and notifications which was first provided within the framework of the Process of Analysis and Information Exchange as documents AIE/S4 dated 6 November 1997, AIE/S4/Rev.1 dated 10 June 1998 and AIE/S4/Rev.2 dated 25 November 1999. The paper takes into account notifications by Members received by the Secretariat up to 15 May 2000.
2. The paper covers methods of tariff quota administration and tariff quota fill. As principal point of reference, the tariff quotas set out in Part I, Section I-B of Members' Schedules (or, in the case of Brazil and the United States, Part I, Section I-A) are used. However, the paper also takes into account modifications via technical rectifications, Article XXVIII negotiations or Article XXIV:6 negotiations. In the case of the European Communities, the draft Schedule for the EC-15 is used as the point of reference as this is the basis on which the European Communities' Table MA:1 and MA:2 notifications were submitted to the Committee on Agriculture.² The information presented covers the 1995-1998 implementation years.³
3. For the purposes of this paper, the tariff quotas have been categorized according to principal administration methods and additional conditions. In the main body of the paper, information is provided on tariff quota fill rates for the 1995-1999 implementation years in relation to (i) categories of principal administration methods and (ii) additional conditions. Annex A lists the product categories used in compiling the information while Annex B presents a set of detailed tables. Finally, a complete listing of Members' tariff quotas, their respective administration methods, and the corresponding fill rates in the 1995-1999 implementation years is provided in the Attachment to this paper.
4. Throughout this paper, "n.a." has been used to signify "not available", i.e. (i) no notification has been received by the Secretariat by the cut-off date, or (ii) imports under generally-applied in-quota rates were not reported, or (iii) the data relating to the tariff quota was aggregated with another tariff quota or (iv) the country concerned was not a Member in the relevant period. "-" has been used to signify "zero".⁴ Blanks indicate that the case at issue was not identified in notifications.

¹ For the purposes of this note, including in the headings of the tables, "tariff quotas" should be taken as meaning "tariff and other quotas".

² For additional technical aspects concerning the tariff quotas see the Secretariat's paper G/AG/NG/S/7 dated 23 May 2000.

³ The term "implementation year" is used as short-hand for the relevant calendar, financial, or marketing year (G/AG/W/2/Rev.4 refers).

⁴ See Country Notes in Annex A of G/AG/NG/S/7 for additional technical details.

Categories of tariff quota administration methods

5. In order to facilitate the analysis of tariff quota administration methods, the Secretariat has, following an examination of Table MA:1 notifications and the summary reports of the Committee on Agriculture, derived categories of principal administration methods (Table 1) and categories of additional conditions (Table 2).

Table 1: Categories of principal administration methods

Code	Description
AT	- "applied tariffs": No shares are allocated to importers. Imports of the products concerned are allowed into the territory of the Member in unlimited quantities at the in-quota tariff rate or below.
FC	- "first-come, first-served": No shares are allocated to importers. Imports are permitted entry at the in-quota tariff rates until such a time as the tariff quota is filled; then the higher tariff automatically applies. The physical importation of the good determines the order and hence the applicable tariff.
LD	- "licences on demand": Importers' shares are generally allocated, or licences issued, in relation to quantities demanded and often prior to the commencement of the period during which the physical importation is to take place. This includes methods involving licences issued on a first-come, first-served basis and those systems where licence requests are reduced pro rata where they exceed available quantities.
AU	- "auctioning": Importers' shares are allocated, or licences issued, largely on the basis of an auctioning or competitive bid system.
HI	- "historical importers": Importers' shares are allocated, or licences issued, principally in relation to past imports of the product concerned.
ST	- "imports undertaken by state trading entities": Import shares are allocated entirely or mainly to a state trading entity which imports (or has direct control of imports undertaken by intermediaries) the product concerned.
PG	- "producer groups or associations": Import shares are allocated entirely or mainly to a producer group or association which imports (or has direct control of imports undertaken by the relevant Member) the product concerned.
OT	- "other": Administration methods which do not clearly fall within any of the above categories.
MX	- "mixed allocation methods": Administration methods involving a combination of the methods as set out above with no one method being dominant.
NS	"non-specified": Tariff quotas for which no administration method has been notified.

Table 2: Categories of additional conditions

Code	Description
d	- "domestic purchase requirement": An additional condition requiring the purchase or absorption of domestic production of the product concerned in order to be eligible to secure a share of the tariff quota.
l	- "limits on tariff quota shares per allocation": An additional condition involving the specification of a maximum share or quantity of the tariff quota for each importer or shipment.
x	- "export certificates": An additional condition requiring the submission of an export certificate or licence issued by the exporting country concerned in order to be eligible to secure a share of the tariff quota.
h	- "past trading performance": An additional condition limiting eligibility to secure a share of the tariff quota to established importers of the product concerned although allocations are not made in proportion to past trade shares.
o	- "no other conditions": None of the above were identified.

6. Following the establishment of these categories, the Secretariat, in a first step, classified each tariff quota according to the principal administration method. In a second step, this classification of tariff quotas was further elaborated by using, where evident from the notifications, additional conditions as set out in Table 2. This list of additional conditions is not exhaustive, nor is it suggested that they necessarily impede trade or tariff quota fill. They are readily identifiable conditions some of which have already been the focus of detailed discussions in the Committee. These additional conditions concern limits on the eligibility of entities that can participate under the relevant principal allocation method set out in Table 1 (e.g. although licences may be issued on demand, only certain entities such as traditional importers of the products concerned are entitled to apply for licences) and other conditions which have to be met (e.g. the purchase or absorption of domestic production, the submission of an export licence from exporting countries, or limits on the maximum share of the tariff quota per allocation). In some cases more than one such condition applies and in other cases none was identified.

7. After classification of each tariff quota through this two-stage process, Members were given an opportunity to comment on the Secretariat's placement of their respective tariff quota commitments. The Secretariat received a number of suggestions for changes. As in the previous versions, most of these suggestions are reflected in this paper. In some cases, however, specific suggestions were not incorporated in order to ensure consistent treatment among Members. The assigned administration methods and additional conditions should generally be considered as indicative and may not perfectly match the description of the category concerned.

8. The number of applicable tariff quotas varies throughout the implementation period for the reasons specified in paragraph 16 of document G/AG/NG/S/7. Table 3 below shows the number of tariff quotas which are excluded from the analysis for each of the implementation years under review.

Table 3: Total number of tariff quotas excluded from the analysis, 1995-99

Country	1995	1996	1997	1998	1999
Bulgaria ^a	73	73	-	-	-
Ecuador	14	-	-	-	-
EC – 15 ^b	2	2	-	-	-
Korea ^c	-	-	-	3	3
Latvia	4	4	4	4	-
Panama	19	19	-	-	-
Total excluded	112	98	4	7	3

- a** Bulgaria, Ecuador, Latvia and Panama became Members on 1 December 1996; 21 January 1996; 10 February 1999; and 6 September 1997, respectively.
- b** On 10 November 1998, the administration of two additional tariff quotas was notified to the Committee on Agriculture (G/AG/N/14 and G/AG/R/18 refer).
- c** The Republic of Korea notified the liberalization of four tariff quotas as from 1 July 1997 as was specified in its Schedule (G/AG/N/KOR/11 dated 15 September 1997, and G/AG/N/KOR/21 dated 18 December 1998 refer). A tariff quota was opened for white silk in 1998 and in-quota imports were reported in G/AG/N/KOR/27.

9. As evident from Table 4 and the Attachment, there are currently 37 Members with a total of 1371 individual tariff quotas specified in their Schedules (excluding four tariff quotas where the initial and final quantity levels are specified to be zero).⁵

10. In 1995-1999 the principal administration method of roughly half of all tariff quotas was "applied tariffs" (Table 4). "Licences on demand" systems accounted for another quarter. The "other" category largely covers three principal administration methods for which no separate categories were established since they are not frequently used: (i) Canada allocates broiler hatching eggs and chicks to federally-registered hatcheries on the basis of the number of chicks hatched by them in a 12-month period preceding the allocation (market share system); (ii) the INCOMEX Import Committee in Colombia issues import licences for poultry cuts subject to "the criterion of protecting the domestic industry"; (iii) Costa Rica's commodity exchange system (applied to 8 out of its 27 tariff quotas); (iv) a lottery system which is applied by Israel to 3 tariff quotas; (v) Japan's import system applied to condensed milk and milk powder used for consumption by international maritime vessels and international airlines; and (vi) the Philippines' tariff quotas administered on the basis of a "market share system" in 1995 and 1996.⁶ This system, which was applied to 6 tariff quotas, was replaced in 1997.

11. In the review of notifications and the Committee's summary reports, it often proved difficult to identify the principal administration method where several methods were in place. For example, most dairy tariff quotas of the United States are administered by allocating a large share of the tariff quota concerned to historical importers, but significant shares are also allocated by lottery or an "exporter designated" method, both of which fall into the "other" category. These tariff quotas, and

⁵ For the tariff quotas with zero initial and zero final tariff quota quantities, see the Schedules of Morocco and Venezuela.

⁶ In a comment to the Secretariat, the Philippines pointed out that the tariff quotas concerned were allocated in proportion to historical trade shares on the domestic market rather than on the basis of historical import shares, since imports were previously banned or minimal.

similar cases, were assigned to the "mixed" category since the administration methods are a mix of the "historical importers" and the "other" categories.

Table 4: Tariff quotas by principal administration method, 1995-99

	Number of tariff quotas				
	1995	1996	1997	1998	1999
Applied tariffs	650	637	668	649	643
First-come, first-served	102	104	148	148	147
Licences on demand	314	323	325	326	337
Auctioning	32	30	50	56	56
Historical importers	47	61	66	75	75
Imports undertaken by state trading enterprises	22	22	21	20	21
Producer groups or associations	8	8	8	8	9
Other	20	21	15	15	15
Mixed allocation methods	55	57	60	61	59
Non-specified	9	10	6	6	6
Total of the above (1)	1259	1273	1367	1364	1368
Tariff quotas excluded (2)	112	98	4	7	3
Total number of tariff quotas in schedules (1) + (2)	1371				

12. Table 5 shows the incidence of additional conditions in connection with principal administration methods. For most of the tariff quotas, the notifications contain none of the additional conditions as defined in Table 2. Out of the total membership, only 18 Members have taken recourse to such additional conditions. Throughout 1995-1999, around one-fifth of all applicable tariff quotas were subject to one or more of the six additional conditions specified in Table 5, i.e. 256 tariff quotas in 1995, 267 in 1996, 274 in 1997, 269 in 1998 and 273 in 1999. The most frequently used additional condition was "limits on tariff quota shares per allocation".⁷ In a few cases, a combination of "past trading performance" with "limits on tariff quota shares", "domestic purchase requirements" or "export certificates" was applied.

⁷ Hungary advised the Secretariat that its tariff quota administration limits the volume that a licence applicant may request per application but not the overall tariff quota share per applicant. At this stage, assignment of this additional condition is made to capture *any* type of quantitative limit on licence applicants, the nature of the limitation being not always clear from the notifications; hence, the classification of Hungary has not been changed.

Table 5: Additional conditions in connection with principal administration methods, 1995-99

Additional conditions	Number of tariff quotas					Number of Members				
	1995	1996	1997	1998	1999	1995	1996	1997	1998	1999
Domestic purchase requirement ("d")	50	50	50	49	48	5	5	5	5	5
Limits on tariff quota shares ("l")	102	113	119	115	119	6	7	7	7	7
Export certificates ("x")	25	25	25	25	24	3	3	3	3	3
Past trading performance ("h")	76	76	75	75	78	7	7	7	7	8
Past trading performance plus limits on tariff quota shares ("hl")	3	3	3	3	3	1	1	1	1	1
Domestic purchase requirements plus past trading performance ("dh")	-	-	2	2	-	-	-	1	1	-
Export certificates plus past trading performance ("xh")	-	-	-	-	1	-	-	-	-	1
Total of the above	256	267	274	269	273	16	17	18	18	18

13. Tables B.1 to B.5 of Annex B provide a summary *by Member* for 1995-1999 of the number of tariff quotas assigned to each of the principal administration methods. Annex Tables B.6 to B.10 provide a breakdown of principal administration methods *by product category* for 1995-1999. The product categories are listed in Annex A. They are the same as set out in Annex A of G/AG/NG/S/7.

Tariff quota fill in relation to administration methods

14. Of the total of 1371 scheduled tariff quotas, fill rates are calculated for 997 tariff quotas in 1995, 1030 tariff quotas in 1996, 1112 tariff quotas in 1997, 883 in 1998 and 193 in 1999, as reported in Table 3 of document G/AG/NG/S/7.

15. For reasons of consistency among Members, the fill rates used in this paper are calculated only up to 100 per cent, i.e. they do not take into consideration "overfilled" tariff quotas. The fill rate is calculated as imports in per cent of the notified volume of the tariff quota (from the Table MA:2 notification). It should be noted, however, that in some cases this notified volume differs from the scheduled quantity (as shown in the Attachment to G/AG/NG/S/7).

16. All averages of tariff quota fill rates are calculated as simple averages. Obviously, simple averages have inherent weaknesses, such as masking the differences in terms of quantity and commercial value of the tariff quota product concerned.

17. The simple average tariff quota fill rates with respect to each of the principal administration methods are shown in Table 6, together with the number of tariff quotas which are included in the calculation of the averages for each category. The simple average fill rates in the bottom line of Table 6 represent the average of the fill rates of all tariff quotas for which data were available.

18. In Tables B.11 to B.15 of Annex B, simple average fill rates are broken down by principal administration method and presented in terms of their frequency distribution for 1995 through 1999, respectively. For each of the principal administration methods, the total number of tariff quotas is split into five specified intervals of simple average tariff quota fill rates (i.e. 0-20 per cent, etc.).

Table 6: Tariff quotas - simple average fill rates by principal administration method, 1995-99

Principal administration method	Simple average fill rates (%)					Number of tariff quotas included				
	1995	1996	1997	1998	1999	1995	1996	1997	1998	1999
Applied tariffs	72	66	66	69	58	453	434	468	323	6
First-come, first-served	56	61	47	51	71	87	96	145	142	18
Licences on demand	59	57	55	53	41	287	313	299	259	138
Auctioning	30	38	60	51	n.a.	30	27	46	17	-
Historical importers	91	80	75	65	89	46	57	61	60	2
Imports by state trading enterprises	81	83	90	86	n.a.	22	22	21	20	-
Producer groups/associations	74	53	75	80	n.a.	8	8	8	8	-
Other	37	38	39	91	99	18	19	13	5	3
Mixed allocation methods	75	84	85	84	78	45	47	45	44	21
Non-specified	100	44	57	44	41	1	7	6	5	5
Overall	66	63	62	62	50	997	1030	1112	883	193

19. A more detailed summary of simple average tariff quota fill rates, broken down by principal administration method, is contained in Annex B of this paper: in Tables B.16 to B.20 the information is summarized *by Member*, and in Tables B.21 to B.25 the simple average fill rates are listed *by product category* for 1995 through 1999, respectively.

20. Table 7 presents a comparison in terms of the simple average fill rates by principal administration method between tariff quotas where the quantities are scheduled to remain unchanged over the relevant implementation period for the Member concerned and tariff quotas where the quantities are to increase.⁸ There are five tariff quotas whose quantities are to decrease over the implementation period.⁹ These are included in the calculation of simple average fill rates for the "constant" tariff quotas. The simple average fill rates in the bottom line of Table 7 represent the average of the fill rates of each included tariff quota.

⁸ Tariff quotas which are to increase over the relevant implementation period are identified by asterisks in the Secretariat's paper G/AG/NG/S/7 (Attachment, Section 1).

⁹ The decreases represent the phasing out of three tariff quotas in Korea and two Swiss tariff quotas affected by technical rectifications.

Table 7: Constant vs. increasing tariff quotas - simple average fill rates by principal administration method, 1995-99

Principal administration method	Simple average fill (per cent)									
	Constant quantities					Increasing quantities				
	1995	1996	1997	1998	1999	1995	1996	1997	1998	1999
Applied tariffs	73	67	68	70	100	63	57	56	69	50
First-come, first-served	67	70	49	52	62	37	42	40	46	86
Licences on demand	69	64	66	64	46	49	50	44	41	38
Auctioning	55	98	100	97	n.a.	24	28	54	41	n.a.
Historical importers	94	85	85	71	78	84	71	56	54	100
Imports by state trading enterprises	100	100	99	100	n.a.	76	79	88	83	n.a.
Producer groups/associations						74	53	75	80	n.a.
Other	100	80	100	100	100	20	26	21	77	99
Mixed allocation methods	76	85	81	82	70	74	83	87	86	83
Non-specified	100	51	57	44	41	-				
Simple average fill rate	73	68	67	66	53	53	53	53	54	48
Number of tariff quotas included	649	672	742	597	67	348	358	370	286	126

Note: For a breakdown of the number of tariff quotas included by principal method of allocation see Table B.36 of Annex B.

21. Tables 8 to 11 show the simple average fill rates of combinations of principal administration methods and additional conditions during the 1995-1998 implementation years. Given the limited number of notifications received for the 1999 implementation year, the corresponding table is not presented for that year. The right-hand columns indicate the simple average fill rates of all tariff quota administrations where relevant additional conditions are specified (e.g., the simple average tariff quota fill rate of administration methods with domestic purchase requirements is 85 per cent in 1996).

Table 8: Tariff quotas - Simple average fill rates by principal administration method and additional conditions in 1995 (per cent)

Additional conditions	AT Applied tariffs	FC First-come, first-served	LD Licences on demand	AU Auctioning	HI Historical importers	ST State trading	PG Producer groups	OT Other methods	MX Mixed methods	NS Non-specified	Simple average fill by additional condition

22. In Annex Tables B.26 to B.30, the *number of tariff quotas* in each category of additional conditions are listed by Member. Annex Tables B.31 to B.35 provide a summary of *simple average tariff quota fill rates* for each category of additional conditions, by Member.

Annex A

Product categories and their content

Code	Broad product categories	Indicative list of content
CE	Cereals	Wheat and wheat flour, oats, barley, maize, rice, other grains, aggregated cereals tariff quotas (e.g. wheat and barley), processed cereals (including pasta, animal feed, etc.)
OI	Oilseeds products	Oilseeds, vegetable oils, oil cakes, aggregated oilseeds tariff quotas
SG	Sugar and sugar products	Sugar, processed sugar-containing products, aggregated sugar and sugar products tariff quotas
DA	Dairy products	Milk and cream (unconcentrated), milk powder, butter and butter oil, cheese, other milk products, aggregated dairy products tariff quotas
ME	Meat products	Bovine meat, pigmeat, poultry meat, sheepmeat, live animals, aggregated meat tariff quotas (e.g. beef and sheepmeat), processed animal products
EG	Eggs and egg products	Eggs, other egg products, aggregated egg and products tariff quotas
BV	Beverages	Wine, non-alcoholic beverages (e.g. water), other alcoholic beverages, aggregated beverages tariff quotas (not fruit juices)
FV	Fruit and vegetables	Pip fruit, citrus fruit, other fruit, aggregated fruit tariff quotas, processed fruit (including juices, jams, etc.), potatoes, other vegetables, aggregated vegetables, processed vegetables
TB	Tobacco	Tobacco, other tobacco products, aggregated tobacco tariff quotas
FI	Agricultural fibres	Cotton, silk, other fibres
CO	Coffee, tea, spices and processed agricultural products from mixed ingredients	Coffee, tea, cocoa, spices, honey, other spices, etc. (this also includes processed products such as infant formula and homogenised foods, sauces, soups, etc.)
OA	Other agricultural products	Other agricultural products (e.g. Chapter 5 of the Harmonized System) and most non-Chapters 1 to 24 products such as dextrans, animal pelts, etc.

Annex B

Detailed tables

Note: "All" in the following tables represents the simple average of the fill rates of all tariff quotas included in the respective analysis.

Note: The information in this table relates to Table 7 of this paper and indicates the number of "constant" and "increasing" tariff quotas for which tariff quota fill data are available.

ATTACHMENT - LISTING OF TARIFF QUOTAS, FILL RATES AND THEIR RESPECTIVE ADMINISTRATION METHOD ¹⁰

In the attached information, the tariff quotas are presented in the same order as in G/AG/NG/S/7. The following abbreviations are used for the columns:

REF	COLUMN 1: a number for reference purposes from 1 (the first tariff quota for Australia) to 1371 (the last tariff quota for Venezuela);
MENO	COLUMN 2: a number indicating the tariff quota for each Member. Tariff quotas have been included in the same order as in the relevant Schedules. This number can be used to see the different number of tariff quotas of each Member: from 2 in Australia, Brazil and Indonesia to 232 in Norway;
DESCRIPTION	COLUMN 3: the product description of the tariff quota taken from Schedules (in the original language). Certain descriptions have been abridged;
HS	COLUMN 4: the product description of the tariff quota in terms of HS classifications taken from Schedules. The Secretariat has updated the information when the transposition to HS 96 has been certified for each corresponding Schedule (See Country Notes, G/AG/NG/S/7 for further details). Certain descriptions have been abridged;
PRO	COLUMN 5: a code representing broad product groups into which each tariff quota has been assigned (see Annex A of this paper for details of the categories).
REG	COLUMNS 6, 8, 10, 12 and 14: a code indicating the principal administration method in the implementation years, 1995-1999 respectively (for the codes see Table 1 of this paper).
ADC	COLUMNS 7, 9, 11, 13 and 15: a code indicating any additional condition in the implementation years, respectively (for the codes see Table 2 of this paper).
FILL RATES	COLUMNS 14 to 18: Tariff quota fill rates (in per cent) are listed these columns for each of the implementation years. In order to put the calculation of tariff quota fill rates (measured throughout in per cent) on an equal footing between Members, the fill rates are adjusted for cases where notified imports are greater than tariff quota quantities by setting a maximum of 100% tariff quota fill. It is this fill measure which is used throughout the body of this paper.

¹⁰ Original language only.
