
Committee on Agriculture

**MEMBERS' PARTICIPATION IN THE NORMAL GROWTH OF
WORLD TRADE IN AGRICULTURAL PRODUCTS -
ARTICLE 18.5 OF THE AGREEMENT ON AGRICULTURE**

Note by the Secretariat

Revision

1. Article 18.5 of the Agreement on Agriculture provides that "Members agree to consult annually in the Committee on Agriculture with respect to their participation in the normal growth of world trade in agricultural products within the framework of the commitments on export subsidies under this Agreement." According to the Committee's Working Procedures these consultations are to be undertaken at the November meetings of the Committee (G/AG/1, paragraph 17).

2. The present note updates and extends the information provided by the Secretariat for the purposes of the Article 18.5 consultations in November 2000 (G/AG/W/32/Rev.3). The attached tables contain, for selected products/product groups and Members, data on the development of export volumes (including food aid) and shares in world exports between 1991 and the most recent year for which data were available.¹ In addition, the attached charts show, for the products/product groups concerned, the world market shares of the leading exporters. In response to a suggestion made at the November 1998 meeting of the Committee, the Annex tables to this note also provide import data (including food aid) for selected products (wheat/wheat flour, coarse grains and sugar) and the respective leading importers among Members.

3. On the export side, the following products/product groups are covered by this note:

- (i) wheat/wheat flour
- (ii) coarse grains
- (iii) rice
- (iv) sugar
- (v) skim milk powder
- (vi) butter and butter oil
- (vii) cheese
- (viii) whole milk powder²
- (ix) bovine meat
- (x) pigmeat
- (xi) poultry meat
- (xii) oilseeds
- (xiii) fruit and vegetables, and
- (xiv) tobacco.³

¹ Data for the base period (1986-90) are included in the previous revisions of this paper.

² Whole milk powder is, in terms of world trade, the main product within the product group "other milk products" in respect of which a number of Members have export subsidy reduction commitments.

³ The product coverage in this fourth revision of G/AG/W/32 has been further extended by including tobacco.

4. The Table below shows the aggregate export values of the product categories listed in paragraph 3 above in the period 1991 to 1999 ("selected" agricultural products). In addition, aggregate export values are shown for agricultural products other than the selected products ("other" agricultural products). The basket of "other" agricultural products includes basic agricultural products, such as cocoa or wool, but also many processed products, such as cereal preparations or wine. These "other" agricultural products account for approximately half of world exports of agricultural products.

World exports of agricultural products, 1991-99 (billion US dollars)

	1991	1992	1993	1994	1995	1996	1997	1998	1999
A – World exports of agricultural products	213.4	229.7	227.1	263.5	305.5	323.5	326.3	305.6	283.8
B – World exports of selected agricultural products	115.7	126.0	121.5	133.3	153.3	167.6	162.3	152.9	143.6
C – World exports of "other" agricultural products (A – B = C)	97.7	103.6	105.6	130.2	152.3	155.9	164.0	152.7	140.2
C as a percentage of A	45.8	45.1	46.5	49.4	49.8	48.2	50.2	50.0	49.4

Notes:

- (1) Data are net of intra-EC trade. EC data are for the EC (15) as from 1991.
- (2) "Selected agricultural products" include cereals, sugar, butter/butter oil, skim milk powder, whole milk powder, cheese, bovine meat, pigmeat, poultry meat, oilseeds, fruit and vegetables, and tobacco.
- (3) The FAO definition of total agricultural products (first row above) comes close, but is not identical, to the product coverage of the Agreement on Agriculture as defined in Annex 1 thereto. See document G/AG/NG/S/6/Rev.1 for agricultural trade data according to the coverage of Annex 1 of the Agreement.

Technical Notes

"Selected" product groups

5. The market shares of the selected product groups presented are based on export volumes, except for fruit and vegetables, and tobacco. The shares of fruit and vegetables, as well as tobacco, are based on export values.

6. Three categories of Members are distinguished in the tables:

- (i) WTO Members with export subsidy reduction commitments,
- (ii) "significant exporters", and
- (iii) others.

7. Each table includes all Members which have, according to their Schedules, export subsidy reduction commitments with respect to the selected product/product group concerned. In the case of Hungary, export subsidy commitments pursuant to the waiver decision are also taken into account (WT/L/238 refers). As a result Hungary is also included in the tables for skim milk powder, butter/butter oil and whole milk powder. In addition, those Members are included which are identified in the list of "significant exporters" for the purpose of the Committee's notification requirements on export subsidy commitments (G/AG/2/Add.1 refers). Furthermore, in order to provide a more comprehensive picture of the development of shares in world exports, in a few cases it was considered

useful to include selected other WTO Members and non-Members, in particular those which have emerged as major exporters during the period covered. For each product/product group, countries are ranked in descending order based on their exports in the most recent year.

8. The product definition of the statistical data presented in this note does not necessarily match the product definitions used for the purpose of export subsidy reduction commitments. This point should be borne in mind, in particular when comparing the statistical data with commitment levels, subsidized exports or total exports as notified pursuant to Table ES:2 of document G/AG/2. For example, although corn exports are, by definition, included in the total for coarse grain exports, the United States' export subsidy reduction commitment for coarse grains does not cover corn. Members with reduction commitments on the basis of aggregate product groups are included in the tables of each individual product/product group covered by the commitment. For example, Switzerland has an export subsidy reduction commitment for dairy products (excluding butter) and is therefore included in the tables for skim milk powder and cheese but not in the table for butter. Members with an agriculture-wide commitment (Costa Rica, New Zealand and Panama) are only included in the tables relating to products/product groups where they have "significant exporter" status.

"Other" agricultural products

9. The world market shares in "other" agricultural products of selected exporters are presented in Table 15(a). For reasons of data availability, the exporters represent the leading countries in terms of total agricultural exports, not necessarily of exports of "other" agricultural products.

Data

10. The data provided in this note are sourced from FAO, the International Grains Council (IGC) and the International Sugar Organization (ISO). Other sources may produce different results in terms of absolute volumes and values as well as year-to-year changes of shares in world export volumes/values. This may be due to a variety of reasons, including differences with respect to product definition, reporting period (e.g. calendar year versus marketing year), conversion factors or the revision of data.

11. The time period covered is 1991 until the most recent year for which data are available from the sources used. In particular, FAO data are currently available only up to 1999. For reasons of consistency, more recent data available from other sources were not used to complement FAO data.

12. The trade data of the EC as well as the aggregate exports/imports (referred to as "world totals" in the tables) exclude intra-EC trade. It should be noted that the FAO data for the EC refer to the EC (15) as from 1991. The International Grains Council provides data for the EC (15) as from 1994/95 and the International Sugar Organization as from 1995.

13. The country-specific and commodity-specific explanatory notes which are contained in the sources are not reproduced in this note. The symbol " – " has been used in the tables to denote not available or not applicable.

Notes:

- (1) Volumes are in wheat equivalent; International Grains Council (IGC) data include wheat, wheat flour and durum (grain and semolina); FAO data include wheat and flour.
- (2) Data for the Czech Republic, Mexico, the Slovak Republic and Switzerland are from FAO; data for all other countries and world totals (incl. CIS intra-trade) are from IGC.
- (3) In the case of South Africa, flour exports are excluded, reported under processed secondary trade by IGC.
- (4) IGC data are for July/June years. FAO data are on a calendar year basis, with 1991 data accorded to 1991/92, 1992 to 1992/93 and so forth.
- (5) For further comments see cover note, particularly paragraphs 12 and 13.

Notes:

- (1) Centrifugal sugar in terms of raw sugar.
- (2) For further comments see cover note, particularly paragraphs 12 and 13
