

**Committee on Anti-Dumping Practices
Ad Hoc Group on Implementation**

**LIST OF ELEMENTS THAT HAVE BEEN CONSIDERED IN SELECTING
TRANSACTIONS TO BE COMPARED IN THE CONTEXT OF A TRANSACTION-TO-
TRANSACTION ANALYSIS UNDER ARTICLE 2.4.2 OF THE AGREEMENT**

Note from the Secretariat

The following criteria have been mentioned by Members as relevant in determining whether an export transaction and a home (normal value) transaction are "comparable" for purposes of transaction-to-transaction comparison to determine the existence of dumping under Article 2.4.2. It was suggested that investigating authorities start by examining export transactions, and proceed, on the basis of relevant criteria, including the following, to select the appropriate home market (normal value) transaction for comparison.

1. Similar merchandise or product (within like product) involved in the export market and home market transactions.
 2. Similar dates of the sales (same date, or the nearest date) of the export market and home market transaction.
 3. Similar levels of trade in the export market and home market transactions.
 4. Similar clients or customers in the export market and home market transactions.
 5. Similar sales volumes in the export market and home market transactions.
