

**Committee on Agriculture
Special Session**

EXPORT SUBSIDIES

Background paper by the Secretariat

Revision

1. At the first Special Session of the Committee on Agriculture which took place on 23-24 March 2000, it was agreed that the Secretariat would prepare a background paper on export subsidies based on notifications made in that area (G/AG/NG/1, paragraph 7(a) refers). The present paper revises and further updates the information compiled from Members' Schedules and notifications first provided in document G/AG/NG/S/5 dated 11 May 2000. This revised paper takes into account the notifications by Members circulated by the Secretariat up to 13 July 2001.

2. The paper lists export subsidy reduction commitments by Member for the implementation years 1995 to 2000.¹ For Members with export subsidy reduction commitments, the detailed information provided by these Members in their notifications is summarized in the Attachment to this note. The paper also provides information regarding notifications received from Members without export subsidy reduction commitments.

Summary of export subsidy reduction commitments

3. Of the current 141 WTO Members, 25 have, in Section II of Part IV of their Schedules, export subsidy reduction commitments.² These Members are listed in Table 2 below along with the number of product specific commitments in each product grouping. The product groupings used are set out in Table 1. They reflect the products and groups of products used for the establishment of export subsidy reduction commitments during the Uruguay Round as in document MTN.GNG/MA/W/24 and in relation to total exports as in document G/AG/2, subject to the following presentational adjustments (shown in bold in Table 1):

- (i) reflecting the nature of many Schedules, the fruit (category 19) and vegetables (category 20) groups have been combined into one (with the code of 20);
- (ii) subsidies on agricultural products contingent on their incorporation in exported products ("incorporated products") have been given the code 23;
- (iii) "other" agricultural products, i.e. those that do not fit into any of the groups used during the Uruguay Round, have been given the code 24; and
- (iv) "all agricultural products" (combined) have been given the code 25.

Table 1 - Product groupings

¹ The term "implementation year" is used as short-hand for the relevant calendar, financial, or marketing year as determined by individual Members. For details see "Year1/2" columns in the attachment hereto.

² In addition, Costa Rica has commitments in Section III of Part IV of its Schedule, requiring it to eliminate or reduce certain incentive schemes applying to non-traditional agricultural products. But as this Section of Schedules is not covered by the notification requirements, it is not taken into consideration throughout the rest of this paper.

Code	Products or groups of products
1	Wheat and wheat flour
2	Coarse grains
3	Rice
4	Oilseeds
5	Vegetable oils
6	Oilcakes
7	Sugar
8	Butter and butter oil
9	Skim milk powder
10	Cheese
11	Other milk products
12	Bovine meat
13	Pigmeat
14	Poultry meat
15	Sheepmeat
16	Live animals
17	Eggs
18	Wine
20 (includes 19)	Fruit and Vegetables
21	Tobacco
22	Cotton
23	Incorporated products
24	Other agricultural products
25	All agricultural products

4. As noted above, Table 2 shows the number of product specific commitments in each product grouping by Member. The information is taken from the Schedules of Members. For the purposes of Table 2, budgetary outlay commitments have been used. Members also have commitments on a volume basis although, in total, there are less of these than budgetary outlay commitments, reflecting aggregate export subsidy reduction commitments (e.g. "incorporated products" and "all agricultural products") for which there are no volume-based commitments.

5. In total there are 428 export subsidy reduction commitments.³ Two commitments apply to "all agricultural products" and five to "incorporated products". The remaining 421 are product-specific commitments with both budgetary outlay and volume commitments.⁴

³ The difference between this figure and the 430 export subsidy reduction commitments shown in the Attachment reflects Australia's commitment on "other milk products" which has been disaggregated into three, i.e. one budgetary outlay commitment and two volume commitments ("fats" and "solids non fats").

⁴ In the case of Poland's "animal husbandry products" commitment, there is no volume commitment in the Schedule.

Table 2 – Number of export subsidy reduction commitments by Member and product group

The use of export subsidies in 1995 - 2000

6. Table 3 gives, by way of aggregate figures for all Members concerned, an overall summary of the use of export subsidies (in volume terms) in relation to annual commitment levels for the 1995, 1996, 1997, 1998, 1999 and 2000 implementation years. Amongst other things, it indicates, by product or product group, the notified volume of subsidized exports as a percentage of the corresponding annual commitment levels. In Table 3 only those export subsidy reduction commitments for which a notification has been received for the year in question are taken into account. For this reason the annual commitment level shown for instance for "Fruit and Vegetables" (code 20) in 2000 is much lower than that in 1999, reflecting the fact that many Members are still to notify for 2000.

7. The information presented in Table 3 can only be considered to be indicative as in some cases quantities as defined by one Member may not be directly comparable with those of another Member because of different product specificity and measurement units (e.g. product weight versus carcass weight for livestock products). In addition, no average figures are given for "other agricultural products" (which ranges from flowers to furskins), nor for "incorporated products" and "all agricultural products". A number of notifications and related commitments have also been excluded because measurement units other than tonnes were used (e.g. units, pieces and litres).

8. In order to adequately reflect the large number of zero quantities of subsidized exports apparent in Members' notifications, Table 3 also includes columns showing the number of zero-use notifications and the number of non zero-use notifications for each product group. The total of these two columns compared to the figure for the corresponding product or product group in the bottom line of Table 2 shows how many notifications are still outstanding.

Table 3 - Export subsidy commitment levels and use by product group, 1995-2000

22	Cotton	80	0	0	0	2

Notes: (i) For each implementation year, the five columns contain the following information (aggregate figures for all relevant Members):
Column 1 - Commitment level in '000 tonnes; **Column 2** - Notified subsidized export volume in '000 tonnes; **Column 3** - Use of commitment levels in per cent (column 2 in per cent of column 1); **Column 4** - Number of non zero-use notifications and **Column 5** - Number of zero-use notifications.

(ii) Commitment levels relate only to export subsidy commitments for which a notification has been received for the year in question. A comparison of notifications received (zero and non-zero) with the information in Table 2 shows the number of notifications outstanding for each product or group of products.

9. Table 4 provides a breakdown of export subsidy use by Member for the implementation years 1995 to 2000. In this case, information on both budgetary outlay commitments and volume commitments is presented. With respect to each implementation year, Column 1 ("simple average") reflects the simple average use by the Member concerned, across all relevant products or product groups, of each export subsidy commitment for which a notification has been received, but excludes cases where zero use of export subsidy allowances is notified for a particular product or group of products ("zero-use notifications"). The exclusion of zero-use notifications is designed to give a more representative picture of those export subsidy allowances (commitment levels) that are actually being used. The figures in Column 1 are expressed in per cent. Where, for a particular Member, no export subsidies were used for any product or product group "00" is shown in Column 1. While the use of simple averages allows the aggregation of export subsidy commitments with different units (e.g. tonnes and litres), the inherent weaknesses must be borne in mind. In particular, it gives no weight to the relative size or value of each export subsidy reduction commitment whether it represents 1 tonne or 1,000,000 tonnes.

10. In Column 2, the number of non zero-use notifications included in the simple average is specified for each Member. Column 3 shows the number of zero-use notifications (which are not included in the simple average).

11. In Table 4 "n.r." is used to indicate that a notification was not required because the country concerned was not a Member in the implementation year in question or, in the case of New Zealand and Panama, there was no volume commitment taken. A blank indicates that a notification is still to be received by the Secretariat. It should be noted that a blank does not necessarily imply an outstanding notification as for several Members, the 2000 implementation year, or the allowable delay for the submission of Table ES:1 notifications, is still under way hence for those Members notifications for 2000 are not yet required. Notifications are now outstanding for the 1995, 1996, 1997, 1998 and 1999 implementation years for all Members for which a blank appears in Table 4.

Table 4 - Export subsidy use by Member, 1995-2000 (per cent)

Notes: (i) For each implementation year, the three columns for budgetary outlay and volume commitments, respectively, contain the following information:
Column 1 – Simple average use of export subsidy commitment levels across all relevant product groups in per cent (excluding zero-use notifications); **Column 2** – Number of non zero-use notifications included in the simple average calculation and **Column 3** – Number of zero-use notifications.

(ii) The information for each Member is based on the notifications for all relevant product groups.

Members without export subsidy reduction commitments

12. Members which have no export subsidy reduction commitments are also required to notify export subsidy use every year under the Notification Requirements and Formats (G/AG/2 and Add.1). Table 5 indicates, for all Members without export subsidy reduction commitments, notifications in the Table ES:1 series circulated as Committee on Agriculture documents. The following symbols are used:

- (i) "n.r." indicates that a notification was not required for the year in question because the country was not a Member in that year;
- (ii) " " (blank) indicates that a notification is still to be received by the Secretariat. Again a blank does not necessarily imply an outstanding notification because of different implementation years and G/AG/2 notification delays. However, notifications are now due for the 1995, 1996, 1997, 1998 and 1999 implementation years for all countries which were Members during that period;
- (iii) "0" indicates that a notification has been circulated as a Committee on Agriculture document, i.e. the Member concerned has notified to the Committee that it has applied no export subsidies subject to reduction commitments. For those developing country Members which used Article 9.1(d) and/or (e) export subsidies under the provisions of Article 9.4 of the Agreement on Agriculture, instead of "0", the total value of such subsidies is shown in Table 5 along with a listing of the product(s) concerned.

Notification performance

13. As concerns the 25 Members with export subsidy reduction commitments the information provided in Table 4 indicates that export subsidy notifications have been received from all of those Members required to notify in 1995 and in 1996, from 92 per cent of Members in 1997 and in 1998, and from 72 per cent of Members for the 1999 implementation year. For 2000, 5 Members with export subsidy reduction commitments have notified thus far under the export subsidies chapeau.

14. As concerns Members without export subsidy reduction commitments, the information provided in Table 5 indicates that export subsidy notifications have been received from 58 per cent of Members required to notify in 1995, from 51 per cent of Members in 1996, from 52 per cent of Members in 1997, 41 per cent in 1998 and from 34 per cent of Members for the 1999 implementation year. For 2000, 13 Members have notified thus far under the export subsidies chapeau.

Attachment

Export subsidies as notified from 1995 to 2000

Based on Members' notifications, this Attachment lists export subsidies for each product or group of products with export subsidy reduction commitments shown in the Schedule of the Member concerned. Both budgetary outlay and volume commitments are covered and the annual commitment levels from the Schedules are also reproduced. A blank indicates that the products concerned were not subject to notification requirements in the implementation year in question (either because the country concerned was not a Member or because that type of commitment (budgetary outlay or volume) does not apply). "n.a." in the percentage use columns indicates that no notification has been received in the implementation year in question.

The Attachment is divided into two sections: **Section I** specifies information concerning budgetary outlay commitments, and **Section II** specifies information concerning volume commitments. The following column headings are used:

MEM	three letter Member code
REF	number from 1 to 430 representing each separate export subsidy reduction commitment
PROD	the product as specified in Members' Schedules (abbreviated) ⁵
CURR (UNITS)	the currency used for budgetary outlay reduction commitments (or the units used for volume commitments)
YEAR1 (YEAR2)	the calendar, financial or marketing years used to specify each budgetary outlay (volume) commitment
Bud1995 (Vol1995)	the annual commitment level for 1995 for each product in terms of budgetary outlays (volumes)
BUDn1995 (VOLn1995)	the notified use of budgetary outlays (volumes) in 1995 for each product
XS95bud (XS95vol)	the notified use of export subsidies expressed as a percentage of the relevant annual commitment level
(1996 to 2000)	the above three columns are repeated for the 1996 to 1999 information

⁵ In original language only.
