NOTIFICATION

Addendum

The following communication, dated 29 May 2002, has been received from the United States.

Risk Management Analysis for the Importation of Clementines From Spain

The Animal and Plant Health Inspection Service, USDA is reopening and extending the comment period for a risk management analysis (previously notified as G/SPS/N/USA/581) prepared by the Animal and Plant Health Inspection Service relative to a proposed rule currently under consideration that would allow the importation of clementines from Spain to resume. This action will allow interested persons additional time to prepare and submit comments.

APHIS will consider all comments we receive on the risk management analysis that are postmarked, delivered, or e-mailed by 14 June 2002.
