Questions posed by the UNITED STATES
concerning the Article XVIII notification of
INDONESIA¹

The following communication, dated 4 February 1997, has been received from the Permanent Mission of the United States.

In its initial and updated notifications, Indonesia briefly described the domestic functions of BULOG for rice. However, Indonesia provided little information about BULOG's role in the procurement, storage, processing and marketing of other commodities. Could Indonesia please clarify BULOG's role in the domestic and international market for other agricultural commodities?

We note that Indonesia did not include APKINDO, the wood products trade association, in its initial Article XVII notification. Could Indonesia please clarify the status of APKINDO as an enterprise as defined in Article XVII?
