The Recruiter,
ACLED

Dear Sir/Ma'am,

APPLICATION FOR THE POSITION OF JUNIOR DATA SCIENTIST - REMOTE

I, hereby, wish to apply for the above-named position in your organization. I hold a degree in Applied Accounting from Oxford Brookes University. I practiced accounting for about 4 years before I transitioned to data science and software.

I have had the pleasure of building a variety of interesting data science projects over the years, including natural language processing of text data – comprising sentiment analysis, emotion analysis, topic modelling, and named entity recognition – machine learning models, analytical dashboards, web applications, interactive data visualizations, and web-based reports.

With my experience, I am convinced that I have the requisite skill set and mindset to enable me successfully fulfil the requirements of the position of Junior Data Scientist - Remote at ACLED. I am a good communicator, team player, and fast learner. I strive for excellence in everything I do, and I am not one to give up quickly when I hit brick walls. Instead, I find a ladder to scale the walls.

As a writer and public speaker, I will not have a hard time effectively communicating insights with stakeholders through insightful dashboards and compelling narratives.

My resume, which is attached to this application for your consideration, gives you more insight into my skills, qualifications, achievements, and contributions.

Please feel free to reach out to me at any time if you have any questions or if you require any further information/clarification from me. Thank you!

Yours sincerely,

Ifeanyi Idiaye
