Dear Sir/Ma'am,

APPLICATION FOR THE POSTION OF PROMPT ENGINEER (REMOTE)

I am writing to apply for the above-named position in your prestigious organization. I have a degree in Applied Accounting from Oxford Brookes University, but have worked for the past 3 years as a data scientist and AI researcher.

I am an R and Python programmer, who is very conversant with conversational large language models, including ChatGPT, Cohere, and open-source Hugging Face large language models.

I am skilled at interacting with these models through prompts, and I have written a few articles regarding that on [Statistics Globe](#).

I have also used many text-to-image generative AI models, such as DALL-E, DreamlikeArt, and Open Journey to generate visually appealing artworks. You can see samples of some of my works on my [Behance profile](#).

I have also built a text-to-image prompt generating software hosted on Hugging Face. You can take a look at it at this url <https://ifeanyi-promptgenerator.hf.space/>

My skill-set includes R, R/Shiny, Plumber, Python, Fast.AI, Hugging Face Models, Gradio, Neo4j, SQL, Gephi, and WordPress.

Therefore, I am hoping that my application for the position of AI Prompt Engineer will receive a favorable consideration, as I have quite a lot to contribute towards your mission.

Yours sincerely,

Ifeanyi Idiaye
